

ANTI RUST 6 DVM

Product code: 265201501

Dewatering rust prevention fluid

This product is a light fluid based on solvents and corrosion inhibitors with added hydrofugant additives that provide water repellence and displacing properties. Leaving an oil-waxy, light amber film with excellent anti-rust properties. Will leave a greasy-oily film that will last outdoor for 6 and indoor up to 18 months.

It is designed to protect ferrous and non-ferrous industrial parts and transportation components during covered shipment and both outdoor and indoor storage. It can also be used to protect parts that have been machined with metalworking emulsions or machinery that has been accidentally in touch with water and as final protection for sheet steel and tubes.

Typical Performance Data

Typical	Test Method	Value
Appearance		Liquid with solvents
Colour		Amber
Density @ 20 °C, gr/cm ³		0.89
Type of film		Waxy-oily
Drying time, minutes		30
Flash point, °C		50
Salt spray test chamber, hours		72
Outdoor protection (months)		6
Indoor protection (months)		18

All performance data on this Technical Data Sheet are indicative only and can vary during production.

Use

To be applied at room temperature. Removal by alkaline or solvent based degreasers.
