

CLEANMAX 1313

Product code: 262100101

High Pressure Cleaner

This product is a high pressure, low foam aqueous cleaner to be diluted with water and used for cleaning all types of parts based on a water solution with tension active agents with high degreasing power.

Applications

Suitable to remove oils, metal working fluids, dirty and dusty environments, grease in industrial vehicles, trains, trucks, cars, parts and components.

Use

It can be applied by spraying or jet.

Concentration level depends upon the dirt of the surfaces. However, for general purpose use concentrations between 2 to 5 %.

Mixing conditions

Dilutions can be easily checked by Refractometer.

% Concentration = Refractometer Reading x 2,5

Typical Performance Data

Typical	Value
Nature	Concentrated water solution
Aspect	Liquid
Colour	Pale yellow
Density @ 20 °C, gr/ml	1.04
pH (solution at 5%)	9
Attack (solution at 2% in water) <ul style="list-style-type: none"> • Iron • Aluminium and alloys 	Nil Nil
Flash point	Non flammable
