

# CLEANMAX 200

Product code: 262100301

## Solvent cleaner

This product is a solvent based cleaner combined with special degreasing components, the product is formulated to clean and remove gums and varnishes caused by oxidation in hydraulic systems, cutting oils, gearboxes and heat transfer systems.

## Benefits & Advantages

- Removes oil and gum deposits.
- High flash point in comparison with standard solvent cleaners
- Cleans and degreases filters, pipes and sumps.
- Exceptional solvency power

## Typical Performance Data

| Typical               | Value  |
|-----------------------|--------|
| Aspect                | Liquid |
| Density @ 20 °C, kg/l | 0.846  |
| Flash point, °C       | 75     |
| Viscosity @ 40 °C Cst | 8      |

All performance data on this Technical Data Sheet are indicative only and can vary during production.

## Use

Add the product directly to the oil at a concentration between 10% and 20% depending on the dirt and circulation time, leaving the product from 100 to 150 hours.

*NOTE: In case of neat cutting oils, only circulate the system do not work during this period.*

Circulate the oil through all the systems and areas where normally the fluid splash like trays, guarding and collectors.

Drain the installation, flush with new oil and refill.

After using this product all filters should be cleaned.
