

CLEANMAX PAG

Product code: 262101601

Circuit cleaner

This product is a synthetic fluid for cleaning varnish and sludge from circuits, pipes and sumps. The action cleaning of the oil is based on its solvency that is based on esters and PAG, therefore it is suitable for cleaning only circuits with PAG. It is not compatible with mineral or PAO oils.

Applications

- The fluid will be mixed with the fluid in use in a proportion of 10%, leaving it on for between 12 and 48 hours.
- During this period the oil must be kept in circulation throughout the system, and can reach the operating temperature.
- Finally, drain the system, clean the filters and fill with fresh oil.

Benefits & Advantages

- Removes oil and sludge deposits
- High flash point compared and low toxicity
- Cleans and degreases filters, acid compounds, sludges and varnishes
- Exceptional solvent power
- Help to extend service life of compressor

Typical Performance Data

Typical	Value
Colour	Yellowish
Density, kg/m ³	980
Kinematic viscosity @ 40 °C, cSt	45
Kinematic viscosity @ 100 °C, cSt	7
Viscosity Index	120
Flash point, °C	240
Pour point, °C	-45

All performance data on this Technical Data Sheet are indicative only and can vary during production.
