

# CLEANMAX SW 80

Product code: 262101801

## Industrial cleaner

This product is extremely effective even with aggressive and hard-to-remove residues and has a strong dissolving action with towards oily and grease substances, firm carbons and dirt. The advantage of this product, is that it not only solves the before mentioned substances, but it's also water-soluble, so that the cleaned parts or surfaces may be rinsed or sprayed with water.

## Applications

This product can be used in processing equipment such as chains, workshops, garages to clean engines, machines or floors.

## Use

To clean engine and machine parts, immerse in the product and after a short exposure time rinsed off with water. Large components may be treated with this product by means of the use of a brush. Afterwards wipe with damp towel.

For heavily soiled floors, spray the product using a watering can and brush to rub the product. After the treatment remove the excess of water.

## Typical Performance Data

Typical	Value
Relative Density @ 20 °C	0.78
Flash point, °C	73
Colour	Colourless
