

CUT 148

Product code: 265400901

Machining neat cutting oil free from chlorine and heavy metals

This product has been formulated from selected paraffinic base oils fortified with especially stable additives. This is a non-active cutting oil that maximizes performance over the wide range of pressures and temperatures encountered when machining under difficult conditions. Does not contain chlorine or heavy metals.

Benefits & Advantages

- Good flushing, cooling and lubricating properties
- Transparent and non-active oil
- Improved tool life and surface finish
- Improved productivity
- Environmentally friendly

Applications

It is designed for machining applications where a high-quality surface is required. It is suitable for all ferrous and non-ferrous metals (all grades of steel, brass, copper, bronze and aluminum) in operations as turning, tapping, milling and screw cutting.

Typical Performance Data

Typical	Value
Colour	Clear amber-yellow
Viscosity @ 40 °C, cSt	18-22
Flash point, °C	185
Pour point, °C	-10
Copper corrosion	None
Iron corrosion	None

All performance data on this Technical Data Sheet are indicative only and can vary during production.
