

CUT 20

Product code: 265401601

Machining neat cutting oil

This product is a light cutting oil with good cooling properties formulated from paraffinic base stock and selected additives. It contains polar and Sulphur-chlorine compounds that avoids welding part/tool, provides superior surface finish, extended tool life and good machine maintenance.

Benefits & Advantages

- Good flushing, cooling and lubricating properties.
- High performance
- Improved tool life and surface finish
- Improved productivity

It is designed for general machining applications as turning, drilling, gear hobbing, milling and threading. It is suitable for all types of steel.

Typical Performance Data

Typical	Value
Colour	Clear yellow
Viscosity @ 40 °C, cSt	18-22
Flash point, °C	180
Pour point, °C	-10

All performance data on this Technical Data Sheet are indicative only and can vary during production.
