

FDX 11

Product code: 265404301

Stamping and forming fluid

This product is an evaporating fluid with a low viscosity specially formulated for stamping and forming applications. The main advantage is that parts do not need to be degreased thanks to very little residue. It does not contain chlorine compounds.

Benefits & Advantages

- Avoids contact between piece and die
- Easy to apply
- Less defect in pieces
- Minimum wear in tools
- High film strength
- Better piece finishing

Applications

It is suitable for lubrication during the drawing, stamping and cutting of electrical and automotive components. It can be applied pure with a brush or a similar application tool.

Typical Performance Data

Typical	Value
Colour	Colourless liquid
Density @ 20 °C, gr/ml	0.73
Viscosity @ 40 °C, cSt	1.3
Flash point, °C	50
Pour point, °C	-20

All performance data on this Technical Data Sheet are indicative only and can vary during production.
