

FORMMAX EC

Product code: 267300201

Biodegradable concrete release agent

This product is an environmentally friendly product for concrete release, formulated with specially selected additives. The product has been designed to provide good release thanks to the thin film formed between the mould and the concrete part, safe with no impact on operators and provides longer life to moulds. This product is a non-toxic product without mineral oil, does not stain moulds neither rubber parts that are in certain types of formworks.

Benefits & Advantages

- Operator friendly
- Biodegradable
- Longer mould life
- Good finishing
- High efficiency
- Non toxic
- Ready to use

Applications

This product is used directly as is. It can be applied with brush, roller, rag or spray gun. Does not expose the product to low temperatures because it could affect stability and other properties. Pay attention to low frost temperatures which can cause separation and creation of water crystals.

Typical Performance Data

Typical	Value
Appearance	Light yellow
Density @ 20 °C, gr/cm3	0.96
Flash point, °C	None
Pour point, °C	10-14
Mould corrosion	No corrosion

All performance data on this Technical Data Sheet are indicative only and can vary during production.
