

# FORMMAX NS

Product code: 267300401

## Lubricant and release agent

This product is a premium performance lubricant based on polyalkylene glycol. Because of its formulation, it leaves a homogeneous surface and enhances release between mold and part.

## Benefits & Advantages

- Good release properties
- High viscosity index
- Good behavior at different temperatures
- Low friction coefficient

## Applications

This product is designed as a mold release agent and also for lubrication of bearings and compressors.

## Typical Performance Data

Typical	Value
ISO Viscosity Grade	100
Density at 20 °C, gr/ml	0.99
Viscosity at 40 °C	100
Viscosity Index	200
Flash point, °C	235
Pour point, °C	-40
Rust Test	Pass

All performance data on this Technical Data Sheet are indicative only and can vary during production.
