

Performance[®] CHAIN WR #56

WATER RESISTANT UNIVERSAL CHAIN OIL

Product Code

267800601

Industrial Spraycans

LUBRICANT OIL

Water Resistant Universal Chain Oil

This product is a multi-purpose water repelling anti-corrosive lubricant for chain applications with high penetration properties. Performs good lubrication into the chain pins and rollers.

This product can be used on drive chains, overhead conveyor chains, hoist chains, forklift trucks, chain saws, delicate moving parts of robots, chain in wet conditions, chain where it's difficult to reach and apply, chain with no central lubrication system.

Benefits:

- Sprayable and therefore easy to use
- Water repelling
- Anti-corrosion properties
- Very good penetration into the chain's pins and rollers
- Low friction properties
- Operates at high temperatures – up to 150°C
- Good adherence to the chain reducing fling off.

e 400ml

Typical Performance Data

Typical	Value
TAN, mg KOH/gr	0,6-0,9
Copper corrosion, 3hrs /100 °C	1a
4-ball, weld load, kg	180
4-ball, wear scar, 1'/70 kg, mm	0,4

How to use:

For the best result, apply Performance Chain WR to the chain directly. Because of its adherent character the lubricant should preferably be applied once the chain is motion. Avoid spraying on hot chains.

All performance data on this Technical Data Sheet are indicative only and can vary during production.
